

TRIGGER — GENUINE CABLE-CUT ASSERTED

Capture is alarm-gated: this pack was compiled only because the device confirmed a real cut. No speculative recording.

INCIDENT REF	CC32-2026-0714	ALARM TIME	2026-07-24 03:12:47 BST
SITE	Site 07 — Compound perimeter (private land)	ALARM	Cable 1 CUT — latched, debounced (genuine)
DEVICE	CC32 — Serial CC000042	CLIP WINDOW	03:12:27 – 03:13:07 (20s pre / 20s post)
IMEI	868140073690042	LOCATION	52.5741°N, 1.3402°W (device GNSS)

1. VEHICLE — Automatic Number-Plate Read

Best plate frame

Extracted crop

READ (consensus of 34 frames)

VE70 XKP

CONFIDENCE0.94 (high)

FRAMES USED34 of 41 (7 rejected: blur/angle)

FIRST SEEN03:12:31 (16s before cut)

DIRECTIONEntered via north gate; departed same

Method: every frame of the clip is scanned for a plate; characters are OCR'd per-frame and the consensus string is taken by majority vote, so a plate blurred in one frame is recovered from another. The registered keeper is **not** looked up — that lawful step is for the police.

2. PERSONS — Best-Face Frame Selection (2 individuals detected)

PERSON A

BEST FRAME03:12:44

FACE SIZE78 px inter-ocular

POSENear-frontal (12°)

SHARPNESSGood

CANDIDATES6 frames kept of 61

PERSON B

BEST FRAME03:12:58

FACE SIZE54 px inter-ocular

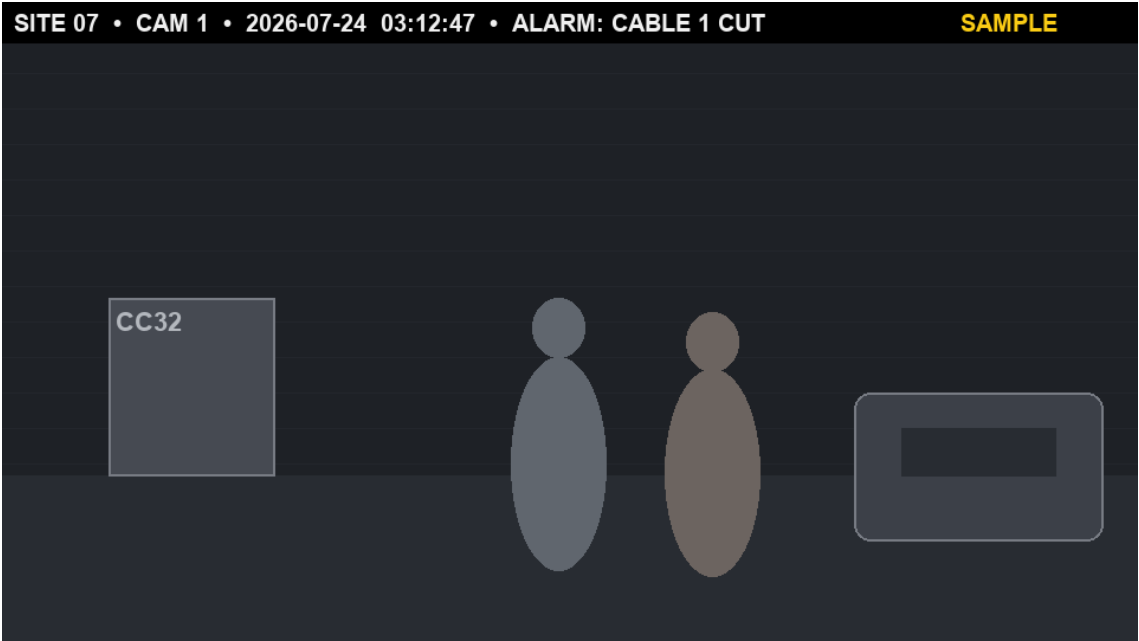

POSE3/4 left (34°)

SHARPNESSFair

CANDIDATES4 frames kept of 39

Method: faces are detected across the whole clip and scored on sharpness, pixel size and pose; detections are grouped per individual so each person gets their own gallery of clearest shots rather than hundreds of near-duplicates. This is frame triage only — **no facial recognition, no database, no matching**.

3. ALARM MOMENT — Wide Scene

Stylised reconstruction for this sample. Real deployments capture full-HD (1080p) frames with burnt-in site, camera and UTC timestamp.

4. CONTINUITY & INTEGRITY

SOURCE CLIP	cc32-CC000042-20260724-031227.mp4 (SHA-256 verified on receipt)
CAPTURE CHAIN	Device ring-buffer → chunked-MQTT upload → server reassembly (hash-checked)
RETENTION	Held 90 days for police/insurer; auto-purged thereafter unless flagged
ACCESS	Admin-only; every view/export logged
BASIS	Private land; capture triggered solely by a confirmed criminal cable-cut

Prepared automatically by the CC32 platform for handover to police. Original footage and per-frame evidence are available on request. This document does not identify any individual; identification is a matter for the investigating authority.
